

*This project has received funding from the European Union's Seventh Framework Programme for research, technological development and demonstration under grand agreement no 314441.*

Co-funded by the EU, CELSIUS is a knowledge transfer and demonstration project with focus on bringing actors together in the district heating and cooling sector, sharing knowledge and showing replicable solutions. The goal is to increase the development of district heating and cooling systems in Europe, which consequently will increase energy efficiency, as well as address fuel poverty, increase energy security and decrease greenhouse gas emissions. The CELSIUS partners are Göteborg Energi AB, City of Gothenburg, SP, IMCG, Interactive Institute, Greater London Authority, Islington Council, London School of Economics, Imperial College London, City of Cologne, RheinEnergie, University of Applied Sciences Cologne, City of Rotterdam, TU Delft, Warmtebedrijf Rotterdam, City of Genoa, D'Appolonia SPA, University of Genua, and IRETI.
